

# 4Cast

## ■ Benefits

# Smarter planning for better real-world results.

Unison 4Cast provides an intuitive managed service solution that facilitates end-to-end planning to support informed decisions that align with business goals.

Fosters sustainability—deliver structure and guidance to advance long-term strategic priorities and monitor execution of objectives and budgets.

Optimize operations, reduce risks, and set a scalable foundation with an integrated planning method, SCORE.

Easily includes analytics to track your planning, and provide reports every step of the way.

Manage finances and budgetary constraints more effectively with a repeatable process.

Saves time and resources by simplifying the preparation and planning process for fiscal staff.

Automates the creation of a single organization-wide view of all departmental plans and budget requests.

## ■ Key Features

Unison 4Cast provides leadership with a modern, web-based business planning solution specifically designed to align strategy, operations, and resources.

- Support centralized and de-centralized planning.
- Monitor resource requests that align with strategic goals and tactical objectives.
- Configure multiple funding sources with no limit to the number of sources. Any individual budget line item can be allocated to a funding source or split among multiple.
- Generate reports and graphs to enable executives and departments to assess progress and make informed decisions.
- Develop informed decisions at various departmental levels with modules for Planning, Monitoring, Administration, and Reporting.
- Track financial performance with a monitoring platform that aggregates data from across the organization.
- Web-based solution with 24/7 availability, support, and a simple interface for a user-friendly experience.
- Validate data to verify accuracy and consistency throughout the planning process.

# The SCORE Model

The SCORE model is a proprietary planning methodology, proven to drive results for large organizations nationwide. This proven, 5-step process provides the framework for identifying top priorities, aligning operations and resources, and engaging staff to tackle critical operational challenges. With SCORE, your team can improve efficiency and build accountability throughout all levels of your business.

## Strategy

Develop strategic goals and priorities, and access roadblocks.

## Collaboration

Build consensus among stakeholder groups and improve communications.

## Operations

Deliver technology and support to build an integrated operational plan incorporating priorities, resources, and budget.

## Results

Provide structure and guidance to advance strategic priorities and monitor execution of objectives and budgets.

## Excellence

Establish a culture of ownership and business acumen among leadership and management, create commitment to ongoing execution.
