

Insight.

■ Benefits

Increase productivity and compliance across your organization.

Unison Insight Platform provides advanced, unrivaled intelligence, collaboration, and data integrity to acquisition professionals.

Reduce PALT by automating tedious, time-consuming tasks

Promote collaboration between program and acquisition offices

Gain visibility with powerful reporting and analytical capabilities

■ Key Features

Unison Insight uses the latest data-mining, AI, and RPA technologies to give acquisition teams powerful reporting and analytical capabilities.

■ Unison PMR provides workspace(s) based on line of inquiry, review or audit

■ Unison Closeout and Bulk Mods automatically create SF-30s, mods, validations, approval routings, de-obligations, and FPDS-NG records

■ Unison Accelerator provides tools to efficiently guide the program office through each step of the process and keeps stakeholders informed on the progress of the activity

■ Unison Document Management supports tool consolidation efforts with its patented architecture allowing for rapid application and form generation
