

Program Insight Platform.

Align Teams, Boost Productivity and Morale.

The Program Insight Platform quickly and continually provides program, acquisition and technical leaders a shared understanding of program cost, schedule, performance and risk.

Cost

Get accurate, intuitive views of budget, commitments, obligations and expenditures

Schedule

Review progress versus key tasks, view resource assignments, delivered notifications whenever appropriate.

Performance

Create Quality Assurance Surveillance Plans and record scheduled performance.

Collaboration

Enable collaboration between the program and other integral offices, such as contracting, legal and finance.

Key Features

The Program Insight Platform maintains a single version of the truth so that team members can quickly understand each aspect of the program and keep stakeholders apprised of progress.

Perfect, Affordable Fit

- Configurable workspace(s) based on program type/category with necessary templates, task lists, milestones, documents and guides.

Easy to Learn and Use

- Page level on-line guidance to enable the end user to understand the data.

Right Reports for Each Audience

- Capture structured data for reporting and situational awareness.
- Roll-up cost information from program to portfolio level.

Clarifies Team Structure and Roles

- Establish Integrated Program Teams (IPT).
- Ability to assign tasks and milestones to individuals or teams.

Weaves Together Existing Information

- Link or interface to other tools and systems (e.g. risk, CDRL, CM tools).
- Links to documents in existing repositories (e.g. SharePoint, websites, intranet).

Turnkey Document Management:

- Document templates to help standardize documents.
- File structure to organize documents.
- Workflow to enhance collaboration.
- Ability to create consolidated packages for a range of objectives and subteams (e.g. Acquisition Strategy, Contract Status).
