

# Prime.

## ■ Benefits

# Streamline contract management.

Unison Prime streamlines and automates all aspects of managing awards, including comprehensive support at the line-item level, turnkey clause updates and management for FAR, DFARS, and agency supplements, and ready integration with all modern financial systems.

### Fully comply with government reporting requirements

Accurately and efficiently respond to data calls, including those from Finance, Business Development, Compliance, GSA, DCAA, and DCMA.

### Implement an efficient and standardized workflow

Shift focus to mitigating insidious contracting risks and allowing time for customer relationships.

### Retain vital institutional knowledge

Scale your organization without proportional increases to the size and cost of the Contracts department.

## ■ Key Features

Unison CLM is purpose-built for GovCon and supported by a team with deep domain experience in federal contracting. It provides contracts professionals with an intuitive, efficient, integrated approach to accurately, promptly answer data calls and fully comply with FAR/DFARS and agency-specific regulations.

### ■ FedRAMP Moderate Certified

■ Out-of-the-box integration with leading financial management, BI, and CRM systems

■ Standard Contract Brief to meet DCAA audit requirements

■ Data staging area and transformation scripts to minimize the time and effort in bulk data uploads at deployment or for special projects

■ Automation of urgent, tedious, high-volume aspects of FAR/DFARS compliance, data calls, and reporting

■ Central repository of contract documents easily accessible across the organization

■ CLIN/SLIN/ACRN tracking to verify, report, and provide notifications regarding available funding
