

Closeout.

■ Benefits

Automate the federal closeout process.

Unison Closeout automates the otherwise time consuming, exacting, manual processes of closing out contracts, grants, and other awards. Using the power of technology, acquisition and financial assistance professionals can account for and free-up funds quickly, allowing them to focus their attention on complex closeouts and other strategic work.

Reduce time spent on the current manual process to closeout federal contracts, grants, and other awards.

Enable acquisition offices, contracting officers, and grant officers to focus on other mission critical needs.

Reduce tied-up financial obligations.

Improve accuracy of reporting.

■ Key Features

Unison Closeout is an enterprise robotic App, automating the federal closeout process.

- Auto-create SF-30.
- Auto-create contract or grant mod.
- Automatically complete validations.
- Automatically send through approval process, if necessary.
- Auto-complete de-obligation in finance, if any remaining funds.
- Automatically complete FPDS-NG record for mod, if applicable.
- Closeout award.
