

Align finance, program and BD expectations with accurate, centralized contract data.

Unison CLM, a FedRAMP Moderate Certified solution, provides contracts professionals an intuitive, efficient, integrated approach to full contract lifecycle management from business development through contract close-out.

Accurately and promptly address the heavy flow of urgent data calls from federal customers, auditors, and executives.

Mitigate insidious contracting risks with enhanced visibility and a better understanding of FAR/DFARS and agency-specific regulations.

Implement an efficient, standardized workflow to enable scalability of contracts under management without proportional increases to the size and cost of the contracts department.

■ Modules

Contract Lifecycle Management toolkit.

Unison CLM Modules provide comprehensive support to contract managers. They ensure compliance with FAR/DFARS and supplements. They provide access and reporting controls and capabilities that make data calls and audits efficient and painless. They provide confidence to compliance and finance executives and protect contract managers from excessive and surprise overtime.

Pre-Award.

Pre-Award captures and validates key information throughout the proposal process, provides an effective and readily auditable OCI vetting and mitigation process, and easily integrates with Salesforce and other CRM systems.

Prime.

Prime streamlines and automates all aspects of managing awards, including comprehensive support at the line-item level, turnkey clause updates and management for FAR, DFARS, and agency supplements, and ready integration with all modern financial systems.

Subcontracts.

Subcontracts provides industry leading flowdown capability to minimize data entry, maximize data integrity and ensure compliance, deliver must-have CPSR workflows, folder structures, and checklists, and integrate with all modern financial systems.

CDRL Prime.

CDRL Prime provides contractors with an intuitive, highly automated, end-to-end approach to effectively manage data deliverables as a prime or subcontractor to include supplier data deliverables.

Integration.

Unison CLM offers out-of-the box configurable APIs—providing mapping, queuing, and logging capabilities that accelerate and enhance integration options, especially for customers who want to avoid middleware licensing costs.

Advanced Connector.

Advanced Connector provides enhanced integration capabilities between Unison CLM and other enterprise systems, including financial systems, sales and opportunity tracking systems, business intelligence technologies, as well as automated purchasing and electronic signature solutions.

Data Extraction.

Data Extraction significantly reduces the time and effort needed to keep current with new awards and contract modifications.

FARClause

FARclause provides tools to help you comply with the FAR. Extract clauses from RFPs and contracts, validate dates, analyze risk, and generate mandatory flow down clauses relevant to your subcontractors.

■ Clients

Who uses CLM.

Professionals from Contracts, Procurement, Compliance, Finance, BD, and Program Operations make better decisions faster with help from the CLM Suite.

Contract executives, managers, and specialists

Automate the tedious aspects of their jobs so they can focus on strategic work with colleagues and customers.

Finance and compliance professionals

Validate financial forecasts, reduce DSO, and mitigate enterprise, department, and career risks.

BD and Program Operations teams

Find optimal contract vehicles, easily find and leverage past performance records, and inform customer communications about funding, deliverables, and key modifications.
