unison
Contract Lifecycle Management

Subcontracts.

■ **Benefits**

Comprehensive subcontract management.

Unison Subcontracts provides industry leading flowdown capability to minimize data entry, maximize data integrity and ensure compliance, deliver must-have CPSR workflows, folder structures, and checklists, and integrate with all modern financial systems.

Easily locate and audit subcontract file documentations.

Avoid public law violations.

Gain visibility and enforce delegation of procurement authority.

Easily flowdown applicable clauses based on dollar value, award, and procurement type.

Prevent documentation gaps based on subcontracting thresholds and contract types.

Capture data to better forecast revenue.

Proactively track adhering to subcontracting plan goals.

■ **Key Features**

Unison Subcontracts enables you to capture all subcontract information from proposal to award, modification, and closeout.

■ Ability to create standard company subcontract agreements (CTAs, IWAs, MSAs, etc.) using data fields, line items, clause library, and deliverables list.

■ FAR/DFARS definition of flow-down requirements on prime contract to automatically flow-down required clauses and the ability for your organization to make global changes.

■ Clause templates to ensure proper inclusion of company standard regulations based on dollar volume of purchase.

■ Approval rules to include escalation based on sole/single source, dollar volume, UCAs, high risk clauses, etc.

■ Automated task checklists, configurable based on award type and dollar volume, to capture compliance requirements, such as annual certifications, SAM/EPLS verification, and SMB Certification, enable internal/external auditing, and assist with CPSR requirements.
