

CM.

■ Benefits

Comprehensive configuration management and collaboration.

Unison CM provides Configuration Managers with a comprehensive approach to configuration identification, change control, audits, status accounting – fully integrated with the ability to process contractor deliverables and collaborate with the program office.

Increased visibility and status to product baseline and change documentation requiring approval.

Confidence in reviewing latest baseline versions of technical documentation.

Better oversight of contractor baselines via configuration audits.

■ Key Features

Unison CM offers comprehensive capabilities, including configuration identification, change control, audits, and status accounting.

■ Based on MIL-HDBK-61, Configuration Management.

■ Track and maintain full configuration of PMO assets: Parts, drawings, software, documents, tech manuals.

■ Use automated business logic and eMail notifications to increase visibility of approval documents, and generate configuration control board (CCB) agendas.

■ Easily report on the status of specified change documents.
