

PRISM.

Benefits

Federal acquisition management system for DoD, civilian, and intelligence agencies.

Unison's flagship PRISM module offers a holistic approach to acquisition lifecycle management and is widely recognized as the most powerful and intuitive contract writing system. It enables acquisition professionals to efficiently and effectively complete federal acquisition tasks, in a compliant way, from planning through closeout.

-  Fully comply with FAR/DFARS, agency supplements, and agency policies
-  Avoid duplicate data entry for sophisticated sourcing, contract writing, and contract administration with guidance based on the type of acquisition
-  Accomplish your paperless office goals
-  Promote structured collaboration with program offices and vendors, eliminating process bottlenecks and compressing PALT
-  Gain real-time visibility and transparency across the enterprise, including comprehensive audit trails

Key Features

PRISM provides managers, policy makers, 1102s, and program professionals with a secure, efficient, proven approach to complying with FAR/DFARS and agency specific regulations.

- FAR/DFARS compliant
- Complete paperless electronic record
- Ability to share data across documents—eliminates duplicate data entry
- Advanced procurement plans
- Acquisition process milestones and PALT tracking
- Pre-contract purchase requests and all solicitation types
- Bid evaluation tailored to federal contracts
- Contract writing to comply with complexities of federal contracting, clauses, and terms
- Guidance based on what you are acquiring
- Compliant with all applicable federal security standards
- SOA-compliant architecture designed for today's modern integrated environments
- Readily interfaces with financial systems, FPDS, FBO, SAM, EDA, and other systems
- Library of web services enabling integration with any modern peripheral system
- Extensive support for shared services providers that need different configurations for their different customers
- Hierarchical support for multi-organization structure
- Rule-based user access
- Workflow and approvals rules
- Workload management
- E-signature support.
- Multi-currency support
- Single sign-on PIV/CAC card enabled
- Structured maintenance program covering customer care, enhancements, technical support, and regulatory changes
- Proven full and fast Initial Operating Capability (IOC)
- Extensive set of standard reports and ad-hoc reporting capability
- Section 508 compliant
