

Get funding where it needs to be, when it needs to be there

Unison's Planning, Budgeting, and Forecasting solution shifts the tedious workload of managing change to an integrated, user workflow defined, machine-learning platform that offers collaboration and embraces teamwork to maximize mission success and minimize the administrative burden.

Emphasize collaboration and coordination between agencies and leadership to maximize mission outcome and foster an environment of creativity and successful problem solving.

Recall and re-promote the last set of unapproved program decreases in a prior budget submission with the click of a button.

Gain greater effectiveness and efficiency in the collection and reporting of information and get your reprogramming letters to Congress with easy intuitive workflow that includes Departmental leadership and the Office of Management and Budget (OMB).

Quickly build exhibits, schedules, and tables needed for your next OMB Budget Data Request.

Ensure apportionments and allotments (or advice of allotments) are automated and 100% seamlessly executed from Enactment through to funding, then added to your agencies financial management system (FMS).

Easily validate that the SF132 and SF133 are reconciled successfully, or users are notified of expected actions for reconciliation to complete successfully.

■ Modules

Planning, Budgeting, and Forecasting toolkit.

Budgeting and Acquisition modules deliver comprehensive support.

Planning, Budgeting, and Forecasting.

Unison's Planning, Budgeting, and Forecasting (PBF) solution solves today's back-office opportunities with a crisp, intuitive, integrated budgeting environment that satisfies the needs of planning, programming, performance, budgeting, and execution professionals all with the added insights of a forecasting and dashboarding capability to visually assess overall agency operation health.

Insight.

Unison Insight uses the latest data-mining, AI, and RPA technologies to give acquisition teams powerful reporting and analytical capabilities.

Budgeting Applications.

Unison's budgeting apps provide the insight necessary to deliver information to the budget analysts from the procurement community. Your financial plan forecasts can include contract related detailed analysis, as well as standard personnel compensation and benefits forecasting.

PRISM.

Unison's flagship PRISM module offers a holistic approach to acquisition lifecycle management and is widely recognized as the most powerful and intuitive contract writing system. It enables acquisition professionals to efficiently and effectively complete federal acquisition tasks, in a compliant way, from planning through closeout.

Program Management

Unison Program Management enables your team to easily manage CDRLs and configurations, track and mitigate risks, monitor budget and assess scheduling impacts.

■ Clients

Who uses PBF.

Budgeteers

Budgeteers (560 job series) are the power users of the Planning Budgeting and Forecasting Suite. They use the suite to plan for the President's Budget, forecast the baseline and policy budgets for the outyears, and confirm overall agency operating health.

Program Performance & Finance Personnel

Program performance personnel (340) and finance personnel (501) leverage the suite when planning, programming, and performing in and across agencies to achieve mission success.
