

UnisonCLM Data Extraction Module

Redefining the Way You Work.

UnisonCLM's Data Extraction Module is a game changer for government contract professionals. It isn't just about better managing contract data. It's about transforming this tedious, mundane undertaking into an experience that empowers you to do more with less effort—unlocking time for strategic priorities and customer-oriented functions.

A Powerful Tool at Your Service.

Our module harnesses the power of Amazon Textract to extract contract data from scanned documents and digital files automatically. The result? No more squinting over documents and triple-checking entries to be sure no errors slip by. Stay updated with new awards and contract modifications without the shackles of outdated, labor-intensive methods—the era of painstaking data input is behind you.

Customer Data, CLIN data and all clauses (FAR/DFAR and agency supplements) are automatically extracted from standard and other forms.

Eliminates data migration barrier allowing the implementation of UnisonCLM more quickly and efficiently.

97%

clause data accuracy

50%

faster CLIN extraction

90%

faster clause extraction

Embrace a New Era in Contract Management.

UnisonCLM's Data Extraction Module revamps contract data entry and migration from a dreaded chore into an automated task. Minimizing manual data entry streamlines the transition for new UnisonCLM users and boosts performance for existing ones unveiling a new era of contract management—where automated processes liberate your expertise for strategic decision-making.

Don't let contract data hold you back.
