

# Master your contracts with an expertly-designed contract management system.

## The contract management solution that streamlines your business processes.

Unison Contract Lifecycle Management (CLM) is a specialized system **designed by government contract experts for government contract experts**. Our CLM system streamlines the entire lifecycle of government contracts and subcontracts, from creation and negotiation to renewal and closeout—simplifying and enhancing the contracting process while significantly reducing risk.

Purpose-built to meet your unique requirements and challenges

Audit ready for DCAA, DCMA, and other regulations.

Comprehensive, out-of-the-box options

Automatically track and update FAR, DFARS and other agency supplements

**Redefine your role from admin to advisor—emerge as a proactive, high-value resource.**

UnisonCLM revolutionizes your work. Overcome the frustrations of being reactive as tasks like responding to data calls, audits, and government reporting become effortless. With our powerful subcontract module, generating agreements becomes a streamlined process, freeing up your time for high-value work. Focus on new win strategies, provide expert guidance, and forge stronger relationships.

**Seamless integration, or no integration at all—UnisonCLM works either way.**

UnisonCLM is platform agnostic and integration-friendly. No CRM? No problem. Our system operates independently, yet seamlessly integrates with your existing CRM and ERP software, offering enhanced agility, customization, and compatibility with your finance, program, and business development systems, simplifying your workflows with ease.

# The impact of UnisonCLM.

UnisonCLM's 3,500 users have experienced significant advantages in contract management leveraging a centralized system—entrusting UnisonCLM with **over 100,000 of their contracts** and crucial supporting documents. They also have experienced:

**50%**

shorter contract lifecycles

**30%**

**55%**

stronger compliance

**25%**

higher booking/  
renewal rates

## Benefits for key decision-makers.

### UnisonCLM & the CFO

With UnisonCLM, CFOs will see streamlined processes, consistent data for reporting and billing, and data alignment across all business systems. A centralized system provides CFOs with access to complete and consistent data to enable strategic decision-making and cost optimization.

### UnisonCLM & the CIO

We offer a comprehensive solution for CIOs, providing benefits such as data consolidation, open APIs and architecture, FedRAMP Moderate Authorization and compliance, and cost savings. With the ability to easily connect and manage data, ensure secure connections, and reduce IT spending, our system can help organizations adapt to digital transformation and streamline processes.

### UnisonCLM & Programs

Program personnel optimize their work using our system. With improved visibility, program managers can stay on top of deadlines and meet contractual obligations. UnisonCLM can help augment operations, improve contract performance, and identify areas where improvements can be made—aiding in avoiding costly disputes and delays by mitigating risks and ensuring compliance.

## Reclaim control of your contract management with UnisonCLM.

**UnisonCLM is the ultimate tool for exerting control over your contract management processes. Precisely calibrated for government contracts and subcontracts, it combines flexibility with comprehensive, out-of-the-box features. Transform your workflows into a unified, efficient operation where you can be proactive instead of reactive—contract management, rediscovered with UnisonCLM.**
